Welcome to Michigan State University’s Undergraduate Athletic Training Education Program. Congratulations on being selected from among many outstanding applicants from across the country to become a part of the Spartan Athletic Training Tradition. Our staff is looking forward to working with quality students like yourself in the process of developing individuals who will contribute to the profession of athletic training.

Athletic training is a profession which demands dedication and hard work without much credit or thanks. As an athletic training student, you will be involved with the prevention, assessment, and rehabilitation of injuries in a variety of patients and various clinical settings. In order for our program to operate efficiently, athletic training students must work diligently and assume all responsibility that is delegated to them in a mature and responsible fashion. *It is very important that you familiarize yourself with the contents of the Michigan State University Undergraduate Athletic Training Handbook.* The handbook provides answers to many of your questions and describes the policies and procedures of our program.

We believe the best method of learning is to combine didactic knowledge and clinical experiences in the learning environment. The opportunity to apply classroom knowledge in the athletic training room will be greatly available and will enhance the learning process. Like the profession, our program requires many hours of both classroom and clinical time. In order to succeed as a student as well as in our program you must learn to budget your time and prioritize your commitments and activities.

It is the objective of every member of the MSU Sports Medicine staff to contribute to the development of each athletic training student for a successful career in the profession. Again, congratulations and welcome to the Michigan State University Undergraduate Athletic Training Education Program. Go Green!! Go White!!

Tracey Covassin, Ph.D., ATC
Director, Undergraduate Athletic Training Education

Kimberly Kittleman, M.S., ATC
Assistant Athletic Trainer, Clinical Coordinator

Jeff Monroe, M.S., ATC
Head Athletic Trainer

John Powell, Ph.D., ATC
Director, Graduate Athletic Training Education
Mission Statement of Michigan State University

Michigan State University holds a unique position in the state’s educational system. As a respected research and teaching university, it is committed to intellectual leadership, and to excellence in both developing new knowledge and conveying that knowledge to its students and to the public. And as a pioneer land–grant institution, Michigan State University strives to discover practical uses for theoretical knowledge, and to speed the diffusion of information to residents of the state, the nation, and the world. In fostering both research and its application, this university will continue to be a catalyst for positive intellectual, social, and technological change.

Founded in 1855 as an autonomous public institution of higher learning by and for the citizens of Michigan, this institution was in 1863 designated the beneficiary of the Morrill Act endowment. It became one of the earliest land–grant institutions in the United States. Since 1863, Michigan State has evolved into an internationally–esteemed university, offering a comprehensive spectrum of programs and attracting gifted professors, staff members, and students. The University, seeks excellence in all programs and activities, and this challenge for high achievement creates a dynamic atmosphere. At Michigan State University, instruction, research, and public service are integrated to make the institution an innovative, responsive public resource.

As the only land–grant institution in the state, Michigan State University is committed to providing equal educational opportunity to all qualified applicants; to extending knowledge to all people in the state; to molding professional and technical instruction with quality liberal education; to expanding knowledge as an end in itself as well as on behalf of society; to emphasizing the applications of information; and to contributing to the understanding and the solution of significant societal problems. Michigan State University's adherence to academic freedom and open scholarly inquiry supports these essential academic functions.

The university's land–grant and service mission first originated in the areas of agriculture and the mechanic arts. While these emphases remain essential to the purpose of Michigan State, the land–grant commitment now encompasses fields such as health, human relations, business, communication, education, and government, and extends to urban and international settings. The evolution of this mission reflects the increasing complexity and cultural diversity of society, the world's greater interdependence, changes in both state and national economy, and the explosive growth of knowledge, technology, and communications. Just as the focus on agriculture and the mechanic arts was appropriate when Michigan State University was founded, the wide range of instructional research, and public service commitments that now characterize this university is essential today.
By 1964, the instruction, research, and public service activities at Michigan State University had achieved the high level of excellence necessary for membership in the Association of American Universities (AAU). Innovation and leadership in these three crucial areas, and in the extension of knowledge to the state, the nation, and the world, are the hallmarks of this university. An excellent and diverse faculty insures the superior quality of academic programs, and contributes to the expansion of knowledge and its application in the public interest.

Research and scholarship help preserve and enrich cultural and creative traditions, as well as contribute to the formulation of new knowledge. Graduate programs draw upon and support faculty research, extend the benefits of research, and educate students for professional careers. The established national and international reputation of the university is based upon the quality and distinctiveness of the research and scholarly activity of its faculty and students.

Research and public service are mutually enriching activities for both faculty and students, and contribute significantly to the high quality of both undergraduate and graduate instructional programs. Through research, faculty members enhance the scope and effectiveness of their teaching. Through public service, faculty validates past research findings and identifies the need for new research and for modifications of curricula. Participating with faculty in research and service projects provides students with unique learning opportunities, and consequently improves the quality of both graduate and undergraduate education.

At the undergraduate level, the university offers strong, comprehensive programs in the liberal arts and sciences and in major professional areas which include a significant general education component. Michigan State University provides opportunities for students of varying interests, abilities, backgrounds, and expectations. Underlying all educational programs is the belief that an educated person is one who becomes an effective and productive citizen. Such a person contributes to society intellectually, through analytical abilities and in the insightful use of knowledge; economically, through productive application of skills; socially, through an understanding and appreciation of the world and for individual and group beliefs and traditions; ethically, through sensitivity and faithfulness to examined values; and politically, through the use of reason in affairs of state. Mindful of such purposes Michigan State University is committed to graduating educated men and women with diverse backgrounds who are active learners, ready to assume the responsibilities of leadership wherever opportunities arise.

Michigan State University fulfills the fundamental purposes of all major institutions of higher education: to seek, to teach, and to preserve knowledge. As a land-grant institution, this university meets these objectives in all its formal and informal educational programs, in basic and applied research, and in public service. As an AAU institution, this university meets these commitments through its instructional and research programs. Through the excellence of its academic programs, the strength of its support services, and the range of its student activities, the university provides opportunities for the fullest possible development of the potential of each student and each citizen served, and enhances the quality of life and the economic viability of Michigan. Education of its citizens is the state's best investment in its future. Michigan State University has honored, and will continue to honor, this public trust.
Mission Statement of the College of Education

The College of Education at Michigan State University has a mission of LEADERSHIP, SCHOLARSHIP, AND SERVICE IN EDUCATION.

WE PREPARE PROFESSIONALS FOR LEADERSHIP ROLES IN EDUCATION. Teaching is central to our scholarly identity and to the way we serve the educational needs of communities. We strive to develop and implement excellent, dynamic programs for the preparation of educators.

WE SEEK TO UNDERSTAND, REFORM AND IMPROVE EDUCATION. We study the processes of human learning and development. We move beyond analysis to promote education policy reform and assist in implementation. We seek to improve the conditions of learning and teaching for everyone in a technological society. We conduct comprehensive, rigorous research that addresses the needs and problems of practice. We strengthen connections between theory and practice through partnerships with schools and communities.

WE EXAMINE ISSUES OF EDUCATION ACROSS THE LIFESPAN. We seek to understand how children and adults learn and develop, and how educators can best use that knowledge for benefit of all learners. We recognize that all educators are themselves learners and we are committed to providing opportunities for their continuous professional development. We strive to sustain our College as a scholarly community for students, faculty and staff.

Mission Statement of the Department of Kinesiology

The Department of Kinesiology views its mission as being congruent with that of the College of Education and with that of Michigan State University, a land grant institution and a member of the Association of American Universities. This mission is the fostering of intellectual leadership as demonstrated by the development of new knowledge, the interpretation and application of knowledge, and the dissemination of knowledge to students and to the public at large.

The Department maintains a strong commitment to the education of individuals whose focus is the study of human physical activity and its relationship to well-being. The unique and primary focus of the Department is its role in the development, application, and communication of knowledge that enhances human performance and promotes psycho-social, behavioral and physical health. A basic assumption underlying the teaching research and service functions of the Department is that human well-being can be enhanced by an integrated approach to meeting the biological, psychological, and social needs of individuals.

The Department is involved in both the initial and continued preparation of competent persons in the areas of physical education and human performance. As such, this academic unit provides a basis for continuous professional interaction and collaboration among academic disciplines devoted to the study and advancement of human performance with a broad range of populations. To achieve this objective, the components of teaching, research, and service are related to curricular efforts at the undergraduate and graduate levels leading to bachelor's, master's, and doctoral degrees.
Mission Statement of the Athletic Training Education Program

In order to support the Michigan State University mission of attaining excellence in all programs and activities, the Michigan State University Sports Medicine Team is committed to delivering the highest quality health care to all of its student athletes. This challenge for high achievement creates a dynamic atmosphere suitable for some of the most knowledgeable athletic trainers working in intercollegiate athletics today.

Athletic training is a major specialty in the field of sports medicine where active daily involvement with athletes, physicians, and coaches affects the health care and well-being of the competitive and recreational athlete. Through a combination of medical specialists and the active commitment of the athletic trainer, the sports medicine team at Michigan State University covers a broad entity of healthcare. At MSU, the athletic training student is offered a wide interdisciplinary base of educational and professional development capable of preparing him or her for future job opportunities in the collegiate, professional, clinical, high school, or industrial setting.

Michigan State's educational curriculum program involves an aggressive hands-on experiential learning structure blended with an academically enriched curricula. The Michigan State University athletic training student is exposed to current state-of-the-art philosophies, equipment, and research in athletic training. The athletic training education program encourages both the undergraduate and graduate level athletic training student to experience a broad range of medical and intercollegiate opportunities through a greater awareness into the field of sports medicine.

Undergraduate athletic training student will complete the three year athletic training specialization curriculum program while working with numerous athletic teams at MSU and high schools, gaining knowledge through a variety of situations, settings, and exposures. Through the undergraduate athletic training student’s clinical education, he or she will be exposed to experiences requiring immediate decision making, physician consultation, injury evaluations, and communications with intercollegiate and high school coaches, student-athletes, and clinical athletic training supervisors.
**Athletic Training Educational Objectives**

1. To provide an opportunity for each student to acquire knowledge and develop skills as specified in the document Athletic Training Clinical Competencies. The areas of focus are:

   - Risk Management and Injury Prevention
   - Pathology of Injuries and Illnesses
   - Assessment and Evaluation
   - Acute Care of Injury and Illness
   - Pharmacology
   - Therapeutic Modalities
   - General Medical Conditions and Disabilities
   - Nutritional Aspects of Injury and Illness
   - Psychosocial Intervention and Referral
   - Health Care Administration
   - Professional Development and Responsibilities

2. To provide students with opportunities to integrate didactic knowledge into clinical practice under supervised situations and environments.

3. To continually strive for the highest quality in instruction, clinical experiences, equipment, and student work.

4. To expose students to other allied health care professionals involved with the sports medicine team.

5. To establish and promote standards of conduct that is consistent with the NATA Code of Ethics.

1. Violations of any form and of any policy or procedure must be reported to the Head Athletic Trainer and the Director of Undergraduate Athletic Training Education.

2. Disciplinary actions in response to any violation will be determined by the Athletic Training Advisory Board.

3. The Athletic Training Advisory Board will consist of the Director of Undergraduate Athletic Training Education, Head Athletic Trainer or Associate Head Athletic Trainer, Clinical Coordinator, an Approved Clinical Instructor (ACI) and an undergraduate student.

4. Grievances should first be reported to the Director of Undergraduate Athletic Training Education or the Head Athletic Trainer or the Clinical Coordinator before any other action or procedure.

5. If the grievance is not resolved by the Director of Undergraduate Athletic Training Education, the student should consider seeking help from the Department of Kinesiology, Associate Dean for External Relations and Student Affairs in the College of Education, the Assistant Provost for Undergraduate Education, Assessment, and Academic Services in the Office of the Provost, or the MSU Ombudsman. Contact information for these individuals and departments are available on the university web site.

6. Students formally admitted to the Undergraduate Athletic Training Education Program and individuals enrolled in KIN 127 are regulated by the policies and procedures described in the Michigan State University Undergraduate Athletic Training Handbook.
PROGRAM ADMISSIONS POLICY

1. Individuals seeking admission to the Undergraduate Athletic Training Education Program must be formally admitted.

   A. To be eligible for admission the student must be enrolled as a full time student, complete an application, and submit required materials. The application and list of required materials are available on the web sites for the Department of Kinesiology and the MSU Athletic Training Program.

   B. Admission to the Athletic Training Education Program is competitive and selective whereby a limited number of students are admitted each Spring Semester. Students meeting all selection (application) criteria may be denied admission to this program. Space availability in the formal curriculum is limited to an average of 15 new students each academic year.

   C. The decision regarding final admission is based on the following criteria:

      ✓ Completed Athletic Training Education Program Application.
      ✓ Completion of KIN 125 (First Aid and Personal Safety), KIN 126 (Introduction to Athletic Training), and KIN 127 (Clinical Observation in Athletic Training) with a minimum average GPA of 3.0 for the three courses.
      ✓ University cumulative GPA of 2.5 or above.
      ✓ Essay expressing reasons for selecting Athletic Training.
      ✓ Three personal references.
      ✓ Interview with Athletic Training Admissions Board.
      ✓ Space availability

   D. The deadline for completed admission applications is March 1st of each year.

   E. The Athletic Training Admissions Board reviews all applications and determines the number of students accepted into the curriculum for the following Fall semester.

   F. Decisions regarding acceptance into the program are made before May 30th and students are notified by June 15th.
G. Probationary Admissions may be granted to applicants that do not meet all admissions criteria.

Probationary admissions are considered on a case-by-case basis by the Athletic Training Admissions Board.

The terms of probationary admissions are established between the student and the Director of Undergraduate Athletic Training Education and is documented in the students folder.

2. Transfer Students

A. Transfer students who wish to apply for the Undergraduate Athletic Training Education Program will follow the same published procedures and guidelines as on-campus students.

B. The Athletic Training Admission Board reviews preexisting credits in Athletic Training and First Aid and identifies remedial programs when necessary.

C. The transfer student who is admitted to the Undergraduate Athletic Training Education Program will complete all remaining requirements.

3. Extra Curricular Involvement (Example: Student Athletes/Band Members)

A. Students involved in time consuming extra curricular activities are eligible to apply for admissions into the Undergraduate Athletic Training Education Program. It should be noted that it is not possible to complete the program requirements without full cooperation from the athlete’s coaching staff, band directors, or club leadership.

B. No exceptions will be made to the course sequencing if admitted to the program, nor will exceptions be made for meeting the required guidelines for clinical experience.

C. Clinical experience assignments during the student’s “in-season” may be deferred to the off-season upon approval by the Director of Undergraduate Athletic Training Education. However, during the off-season, the athlete will not be permitted to participate in his/her respective activity if it conflicts with the clinical experience/field experience requirements.
EVALUATION AND RETENTION POLICY

Acceptance into the Michigan State University Athletic Training Specialization requires a continued level of academic and clinical credibility.

1. Satisfactory fulfillment of program requirements is the responsibility of the student.

2. Normal progression toward completion of the program requirements will be monitored by the student, the student’s academic advisor, and the Director of Undergraduate Athletic Training Education.

3. Students are evaluated in the following categories:
   (1) Academic Achievement (minimum 2.5 cumulative GPA)
   (2) Clinical Experience Evaluations

4. A student falling below a 2.5 cumulative GPA at the end of a semester will be placed on Probationary Status for the following semester.

5. A student on Probationary Status must attain a 2.5 cumulative GPA at the end of that semester to return to normal status. A student that fails to meet this requirement will be placed on Suspension Status for the next semester.

6. A student on Suspension Status will be removed from the clinical setting for the duration of the semester and must attain a 2.5 cumulative GPA at the end of that semester. Failure to meet this requirement will result in expulsion from the program.

7. No grade lower than a 2.0 will be accepted in any Athletic Training core course.

8. Students must maintain the following minimum scores on their clinical evaluations:
   - First year students = 35
   - Second year students = 40
   - Third year students = 50

   If a student scores below the minimum score he/she will immediately be placed on probation. The student has until their next evaluation to achieve the minimum standard. If the student remains below the minimum standard, he/she will be suspended from the program for one semester. The student must then meet with the Athletic Training Advisory Board for re-admittance.
9. Students must maintain current certification in CPR, First Aid, and the ORCBS Blood Borne Pathogens course throughout the duration of the program.

10. Leave of absence from the program may result in complete withdrawal from the program unless deemed appropriate by the Director of Undergraduate Athletic Training Education (i.e. unable to attend school due to medical reasons or a religious mission).

11. Failure to maintain standards will result in Probationary Status, Suspension Status, or expulsion from the Undergraduate Athletic Training Program.

**NOTE:**
- KIN core requirements (KIN 121-465) with a minimum grade point average of 2.00
- KIN 320, and 420 level courses must be taken in the sequence listed.
- All other courses should be checked for pre-requisites guidelines.
The clinical experience provides the student with opportunities to integrate psychomotor, cognitive and affective skills with clinical proficiencies within the context of direct patient care. During the clinical experience, the student will be responsible for injury prevention, recognition, management, and/or rehabilitation for athletes/patients in various settings. The clinical experience allows for formal/informal learning, practice, and application of the Entry Level Athletic Training Clinical Proficiencies in a clinical environment.

The primary settings for clinical experiences include athletic training rooms, athletic practices, and competitive events. The student will also be exposed to other settings or facilities such as physician offices, emergency rooms, physical therapy clinics, and billing offices. Students will be provided the opportunity to experience working with athletic practices and competitive events in both men's and women's sports. The clinical experience will expose the student to high risk sports for upper extremity injuries and lower extremity injuries, equipment intensive sports, and general medical needs of both genders.

**Clinical Coordinator**

Kimberly Kittleman, M.S., ATC

The undergraduate athletic training clinical experience is monitored by the clinical coordinator. Rotation schedule for each athletic training student is established by the coordinator. It is the clinical coordinator's responsibility to ensure that the students' clinical experience provides educational learning opportunities while fulfilling requirements as established by the National Athletic Trainers' Association Board of Certification (NATABOC) and the Commission on Accreditation of Allied Health Education Programs (CAAHEP).

**Clinical Settings & Supervision**

Michigan State University currently fields 25 varsity sports teams. These teams operate out of 5 athletic training rooms. The athletic training rooms are staffed by 10 certified athletic trainers (8 of which have full time appointment to the Department of Intercollegiate Athletics [DIA] and the other 2 having partial appointment to DIA) and 6 graduate assistant certified athletic trainers. All MSU certified athletic trainers serve as an Approved Clinical Instructor (ACI) or a clinical instructor (CI). Students are assigned to an ACI throughout their clinical education. Students are informed that in situations in which they are not supervised by an ACI, their role and duties transfer to those of a First Responder. Students are informed of the role and duties of a First Responder and are required to sign the First Responder Acknowledgement form.
Standards and Guidelines Statement

Based on the 2001 Standards and Guidelines issued by the National Athletic Trainers’ Association Education Council, the requirement of “hours” has been eliminated by the National Athletic Trainers’ Association Board of Certification (NATABOC). Instead, students must demonstrate mastery of clinical proficiencies as specified in Athletic Training Clinical Proficiencies, NATA Education Council, ©1999 through a structured clinical education program.

The clinical education component of the MSU Undergraduate Athletic Training Education Program is designed to represent the students' formal acquisition, practice, and evaluation of the Entry-Level Athletic Training Clinical Proficiencies through classroom, laboratory, and clinical education experiences under the direct supervision of an ACI or a clinical instructor. The clinical experience consists of academic courses with academic syllabi that include measurable educational objectives and specific clinical proficiency outcomes that are documented over time. Clinical education will occur in a minimum period of two academic years (4 semesters) and be associated with course credit.

Michigan State University athletic trainer students will be advised to keep an hour log. This log will not be used in the evaluation process of the student but serves as a information source in the event the student transfers to another program that may require documentation of hours.

Clinical Experience Evaluation

The clinical experience consists of academic courses (KIN 427 IA, IB, IIA, IIB, IIIA, IIIB) with academic syllabi. Evaluation criteria and proficiency requirements are presented in each syllabus. Completion of all assigned proficiencies for each course is required prior to advancement to the next clinical experience course.
**Athletic Training Students Dress Code**

All athletic training students are expected to dress appropriately and professionally at all times when they are in the athletic training room and when representing Michigan State University Athletic Training Program. Students should present themselves as a health care professional by being neatly groomed and wearing clothes that are clean and neat. If a student is not properly dressed, they will be sent home to change.

1. Athletic training students should wear a collared polo shirt (green or white) or sweatshirt. These items should have the Michigan State Athletic Trainer logo on them.

2. Athletic training students should wear dress shorts or slacks (khaki, green, or black). Shorts must be of an appropriate length and have hemmed edges (denim shorts are prohibited).

3. Outdoor weather gear may be worn when appropriate but must conform to previously described colors and logo.

4. Athletic training students should wear sneakers that are clean and functional to perform their duties in the athletic training room and at practice and games.

5. No hats are allowed to be worn in the athletic training room.

6. Socks should be of an appropriate color and worn at all times.

7. While traveling with a Michigan State University athletic team, the student should adhere to that team’s dress code.

8. All facial hair should be neatly groomed.

9. Make-up must be worn in the manner representative of a health care professional.

10. Earrings are allowed for female athletic training students only. Earrings must be of the stud type or not hang farther than 1 inch from the ear lobe.

11. Jewelry worn anywhere else on the face is prohibited (i.e., nose ring) unless for religious reasons.

12. All forms of advertisements (i.e. logos on hats, words on a shirt) that may be construed as offensive is prohibited.
13. The Michigan State University Athletic Training Program staff/faculty reserves the right to address other dress code issues not previously mentioned as they arise.

14. Decisions regarding disciplinary actions will be reviewed and established on a per case basis by the Athletic Training Advisory Board.

**Athletic Training Students Personal Qualities**

The athletic training student is responsible for performing many duties while in the athletic training program. They are expected to provide care for athletes while also learning and improving upon their athletic training skills by observing, practicing and attending class. To best accomplish these goals, athletic training students should make an effort to have these personal attributes:

- Athletic training students should maintain good health, vitality and physical fitness.
- The athletic training student should always display professional dress and personal cleanliness.
- An athletic training student should possess a sense of humor, optimism, enthusiasm, understanding, sympathy and tact.
- Athletic training students should try to exert a sense of leadership, self-confidence, initiative, scholarship and intellectual curiosity.
- Common sense and good judgment should always be utilized.

**Absences**

Athletic training students are an important part of the day to day operations of the athletic training room and their teams. Any absence from these roles is discouraged. If a student is going to be absent, they must notify their supervising athletic trainer as soon as possible and alert them of the situation. A decision will be made as to if the student’s absence will be considered as excused or unexcused. All absences will be documented by the supervising athletic trainer. Five or more absences (excused and/or unexcused) will be reported to the Undergraduate Athletic Training Program Director. Disciplinary actions will be determined on a case-by-case basis by the Athletic Training Advisory Board and may lead to a dismissal from the athletic training program.
Outside Employment and Athletic Training

The athletic training student has many responsibilities and duties that they must perform. The time required to fulfill these is great, and leaves little free time. An athletic training student should be dedicated to his/her roles as a student and as an athletic training student. The student’s clinical experience and class work should be given top priority. If a student wishes to hold a part time job and/or participate in other activities, these interests should be scheduled secondary to their athletic training responsibilities.

Drug and Alcohol Policy

MSU athletic training students are required to participate and abide by the Michigan State University, Department of Intercollegiate Athletics, Drug & Alcohol Education and Testing Program (Appendix A). This is a physician-directed program and as such resides under the guidance of the Director of Sports Medicine, or designee. Although this is a student-athlete program, also included are cheerleaders, student managers and athletic training students. As such, athletic training students are subject to drug testing as defined by the program. This program and its sanctions are independent of the NCAA Drug Testing Program.

The overall priority of the program is to institute an acceptable standard of professionalism for the athletic training student and to protect the health and safety of the Michigan State University student-athlete. The focus of the program is to create a state of awareness, recognition, and acknowledgment of the athletic training student’s professional and personal environmental surroundings.

1. The goals of the Michigan State University Drug & Alcohol Program in regards to the athletic training students are:

   A. To promote a safe and healthy environment for the Michigan State University student-athlete.

   B. To create an awareness and recognition of professional and social dilemmas involving the possible use of drugs and alcohol.

   C. To acknowledge a possible substance abuse situation or problem and seek the proper assistance and educational components.

   D. To create an educated, healthy, and safe environment for the present and future careers of the athletic training student.
E. To create a professional knowledge of alcohol and drug program guidelines.

F. To understand all campus, local, and state drug and alcohol regulations and bylaws.

2. Undergraduate athletic training students are expected to positively represent the athletic training profession and the University.

3. Athletic training students shall always serve as a role model to athletes and other athletic training students with whom they have the privilege of working.

4. A violation of the drug and alcohol policy is noted as but not limited to any of the following:
   A. Not abiding by all federal, state, and university laws and guidelines pertaining to alcohol and drug use.
   B. Consuming alcoholic beverages or other illegal substances with any current athlete that the athletic training student provides services for or with any athlete the athletic training student may provide athletic training services for in the future.
   C. Public consumption of alcohol in apparel that identifies the individual with the Michigan State University Athletic Training Program or as part of a Michigan State University athletic team.
   D. Using alcohol irresponsibly and being intoxicated in public.
   E. Using alcohol and drugs in a manner that interferes with the athletic training student’s academic success, performance as an athletic training student, professional relationships, or conviction of an alcohol or drug related offense.

5. Any Michigan State University athletic training student may be disciplined or expelled for conduct deemed unethical, unlawful, unprofessional, or derogatory to the dignity within the Michigan State University’s athletic department, athletic training program and/or the individual’s personal and professional environment.

6. Decisions regarding disciplinary actions will be reviewed on a per case basis by the Athletic Training Advisory Board and will follow the guidelines established by the Michigan State University Drug & Alcohol Program.
7. Disciplinary actions include but is not limited to referral for professional counseling, placement on Probationary or Suspension Status, or expelled from the Undergraduate Athletic Training Education Program.

8. Federal, State, and University laws and guidelines pertaining to alcohol and drug supersede those of this handbook.

9. Details of the Michigan State University, Department of Intercollegiate Athletics, Drug & Alcohol Education and Testing Program is available through the DIA Compliance Office.

Social Relationships Policy

The field of Athletic Training is a health care profession which involves caring, concern, discipline, and self awareness. The athletic training student should be aware of the potential problems with social relationships with an athlete/patient, not only personally, but the implications placed upon the total Athletic Training Staff and Michigan State University.

1. Social situations include, but not limited to, relationships that are fraternizing, promiscuous, and/or romantic in nature are not permitted.

2. Social situations involving an athletic training student and a student-athlete/patient (regardless of gender) are considered inappropriate and in some instances against the law.

3. Violation of this policy must be reported to the Director of Undergraduate Athletic Training Education and the Athletic Training Advisory Board.

4. Disciplinary actions will be reviewed and established on a per case basis by the Athletic Training Advisory Board and may include, but not limited to:

   A. mandatory counseling;
   B. mandatory participation in drug & alcohol testing;
   C. suspension from program;
   D. removal from program;
   E. notification of law enforcement agencies.
ATHLETIC TRAINING ROOM POLICIES AND PROCEDURES

Athletic Training Student Guidelines

1. Athletic training students are expected to report promptly to all work situations. It is expected that they will be present to provide athletic training services for their athletes. They should arrive in time to do all pre-event taping and treatments and stay after the event until all their athletes have been treated and have left the athletic training room.

2. Athletic training students will dress appropriately and professionally at all times when representing the Michigan State University athletic training program (see dress code).

3. The athletic training student is responsible for assisting in the on-going, daily and weekly maintenance of the athletic training room, and for maintaining athletic training room cleanliness.

4. Athletic training students are expected to act in a professional manner when representing the Michigan State University athletic training program. The student will be held accountable for their actions while on or off duty.

5. Athletic training students are responsible for maintaining the academic standards required of them (see evaluation and retention policy).

6. The athletic training student is expected to schedule their classes at appropriate times as to allow for no conflicts with their scheduled athletic training room duties.

7. Athletic training students shall not discuss any confidential information or knowledge with anyone not associated with the athletic training program as to uphold the confidentiality of the athletes that are treated.

8. Athletic training students are required to abide by the travel rules of the sport that they are traveling with.

9. The athletic training students are expected to maintain current First Aid and CPR certifications.

10. Athletic training students are required to maintain the ethical standards of the athletic trainer as set by the National Athletic Trainers Association.
11. Documentation should be kept on all athletes that are treated in the athletic training room. All records should be kept in SIMS as a SOAP note style format. Athlete’s records and files should be kept in the appropriate places.

12. Any Michigan State University athletic training student may be disciplined for inappropriate professional or ethical conduct, or academic deficiencies. Decisions regarding disciplinary actions will be reviewed individually and established per case by the Director of Undergraduate Athletic Training Education and/or the Athletic Training Advisory Board. Violations may be related to, but are not limited to, the following:
   a. Academic standard deficiencies
   b. Inappropriate completion of competency skills testing program requirements
   c. In-service program attendance
   d. Unethical professional or personal behavior
   e. Tardiness or absenteeism
   f. Improper professional attire
   g. Improper usage of athletic training room facilities
   h. Improper usage of athletic facilities for personal interests
   i. Improper usage of job position for personal opportunities
   j. Inappropriate personal use of keys, computers, telephones, or office supplies
   k. Inappropriate use, theft, or selling of medical supplies for personal ventures
   l. Illegal dispensation of prescription medication
   m. Sexual harassment or discrimination practices
   n. Insubordinate or disregard for Athletic Training or Athletic Department guidelines
   o. Unethical communication of injury or athletic team history with non medical personnel
   p. Inappropriate personal relationship with Michigan State University athletic team members

**Athletic Training Room Rules and Regulations**

1. The athletic training room is a medical facility and should be treated as one.

2. Athletes should not be allowed in the athletic training room without supervision and should not be allowed to self-treat.

3. All reusable supplies given out must be first approved by a staff athletic trainer, signed out and then returned when finished. Athletes should not help themselves to any supplies or medication.
4. Only athletes waiting for or receiving treatment should be in the athletic training room.

5. There shall be no horseplay, shouting, swearing, loitering or any other type of disruptive behavior allowed.

6. All athletic equipment should be left outside the athletic training room or placed in the designated area.

7. No cleats, spikes or muddy shoes are allowed in the athletic training room.

8. Appropriate dress should be worn at all times.

9. No eating or drinking in the athletic training room.

10. The athletic training room should be kept clean and neat at all times. All garbage should be placed in the trash can, and all supplies and equipment should be put in their proper place when finished.

11. Athletes are not allowed to use the phone without the permission of a staff athletic trainer.

12. No tobacco products are allowed in the athletic training room.

Rules, regulations and duties are not limited to those listed. Each specific athletic training room will have its own specific rules and duties. Athletic training student should cover these with their supervising athletic trainer at the beginning of each semester.

**University Van Use and Transporting Student Athletes**

A Michigan State University van may be needed to transport athletic training equipment and supplies to and from a practice or event, or to transport an injured or ill athlete. Athletic training students may use the vans for these purposes only. The van is the property of Michigan State University and should be kept in the condition that it was found. Permission from a staff athletic trainer is needed before the van may be used. All traffic laws and parking rules of the university should be obeyed at all times while operating the University vehicle.
The NCAA Rules and Extra Benefits state that a Michigan State University employee may provide a student athlete only reasonable and occasional local (i.e., within a 30 mile radius of campus) transportation. Thus, transportation by a staff or athletic training student of a student-athlete to a medical appointment is permissible. An employee may not utilize a University vehicle for the purposes of assisting a student-athlete move from one residence to another.

**Practice Conduct**

The athletic training student should arrive on time and stay the length of the entire practice. The proper equipment (athletic training kit, water, ice, emergency equipment, etc.) should be in the proper locations and in working order by the start of practice. An advantageous position should be chosen where the athletic training student will be close to the action, be able to see all of the athletes and not be in the way of practice. First aid should be administered as necessary. Athletic training students should always pay attention to the activities going on and always have scissors, band-aids, tape, gloves, gauze pads, etc. in a fanny pack or in their pockets. The athletic training student should be aware of the emergency action plan for the facility where the practice is taking place. The athletic training student is always under the supervision of a staff athletic trainer and they can be called on whenever necessary.

**Event Conduct**

The athletic training student should arrive on time and in uniform. At home contests, the athletic training student should introduce themselves to the visiting team’s athletic trainer and offer available services. When at away contests, athletic training students should locate the athletic training room and introduce themselves to the athletic trainer. All athletic training equipment, emergency equipment, water, ice and other supplies should be in the proper position by the beginning of the game. Athletic training students should not cheer or make critical comments towards or about any athlete or official during an event. Encouraging or positive comments may be made toward the athletes. The athletic training student should know the emergency action plan for the facility where the event is taking place. Athletic training students should act professionally at all times and be aware and attentive to the event taking place.
Injured Athletes from Visiting Teams

When an athlete from a visiting team is injured while participating in an event at the campus of Michigan State University, they will be given the same medical attention and services as a Michigan State University athlete. If a visiting team has a staff athletic trainer, athletic training student and/or team physician traveling with them, they will be allowed to handle the injury or illness according to their own policies. They shall be allowed to use the athletic training and medical facilities of Michigan State University and they shall be treated with courtesy and respect. Treatments and use of modalities for visiting injured athletes that are not accompanied by their staff athletic trainer, athletic training students or team physician, must have a note from their team physician or staff athletic trainer to receive treatment.

Preseason/Holiday/Postseason Requirements

If an athletic training student is assigned to a fall sport with a preseason that starts before classes begin, they may be required to return to school 3-5 days before the practices start. Individuals should attempt to make arrangements for housing during this period. If a problem arises, the supervising staff athletic trainer should be notified and may assist in providing housing. Athletic training students may be able to eat meals with the team or receive the same amount of meal money as the athletes. All arrangements should be discussed with the student’s supervising athletic trainer.

If an athletic training student is assigned to a sport in season during a holiday break, they may be required to stay at the University with their assigned team. Meals or meal money may be provided, and arrangements should be made for housing. All plans should be discussed with the student’s supervising athletic trainer.

If an athletic training student is assigned to a spring sport with a season that continues past the end of spring semester, they are encouraged to continue providing athletic training services with that sport. It is not required due to summer school and employment responsibilities. Athletic training students should discuss their plans with their supervising athletic trainer early in the semester. If an athletic training student chooses to continue on, they will be provided with meals or meal money.
Blood Borne Pathogens

While performing the duties of an athletic training student, there is a potential for exposure to blood and other possibly infectious material. With this possible exposure is a risk of acquiring Hepatitis B Virus (HBV) and Human Immuno-deficiency Virus (HIV) infection. HBV is a serious and potentially life threatening disease and all athletic training students are STRONGLY encouraged to become vaccinated against HBV. The vaccination is a series of three shots given over a six month period. There is no cost to the student to receive the shots at the Michigan State University Olin Center, if they have not already been vaccinated. Athletic training students must fill out a form stating that they have either: 1) already received the vaccine, 2) are in the process of receiving the vaccine, or 3) have chosen not to receive the vaccine. If the student chooses not to become vaccinated against HBV, then they are stating that they acknowledge the fact they are at high risk for acquiring HBV.

At this time, there are no vaccinations against HIV. To help protect against acquiring the virus, universal precautions must be used at all times.

All new athletic training students must complete a Blood Borne Pathogen Exposure Control seminar for First-Aid Responders presented by the Michigan State University Office of Radiation, Chemical, and Biological Safety. This seminar is offered at the beginning of each school year. Every year after that, a refresher course must be taken on the web site for the Office of Radiation, Chemical, and Biological Safety at www.orbcs.msu.edu, to stay up to date and to keep current certification.
NATIONAL ATHLETIC TRAINERS' ASSOCIATION

Background

The National Athletic Trainers' Association (NATA) was organized in 1950 to secure a position for athletic trainers in the health care field. The NATA has worked to raise professional standards, to encourage ethical conduct of its members, and to advance the profession of athletic training. The NATA provides a certification examination to become a certified athletic trainer. A quarterly journal is published by the NATA and an annual convention is held by the NATA to inform members of the profession of new developments in the field of athletic training. The main purpose of the NATA is to improve the quality and status of the athletic training profession.

Membership

Athletic training students are strongly encouraged to become members of the NATA as early in their undergraduate education as possible. Benefits of becoming a member include: discounted fees to state, district and national athletic training conventions, a subscription to the Athletic Training Journal, the NATA NEWS, and eligibility for NATA scholarship.

The application process of becoming a member of the NATA consists of completing the application form for student membership, and returning the form, with the accompanying fee, to the NATA. Student membership applications may be obtained by writing to the NATA or visiting the NATA website at www.nata.org. Memberships run from January 1 to December 31 of each year, and renewal applications are sent out each year.

Certification

The National Athletic Trainers' Association Board of Certification (NATABOC) was formed in 1989 to provide a certification program for entry-level athletic trainers and continuing education standards for certified athletic trainers. The purpose of the NATABOC and its programs is to establish standards for entry into the profession of athletic training and to require all certified athletic trainers to complete continuing education credits to maintain their status in the profession.

For one to be able to become a certified athletic trainer, they must satisfy the basic requirements, the section requirements used to meet eligibility requirements, and pass a three part national certification examination. There is an application process to obtain a spot to sit for the certification examination.
To acquire credentialing information, look on the website or write to the NATABOC. Make sure you meet all of the requirements to sit for the examination and then choose the closest date to graduation or a date post-graduation. You should submit your application at least 3 months before the testing date to assure yourself a spot.
Preamble
The Code of Ethics of the National Athletic Trainers’ Association has been written to make the membership aware of the principles of ethical behavior that should be followed in the practice of athletic training. The primary goal of the Code is the assurance of high quality health care. The Code presents aspirational standards of behavior that all members should strive to achieve.

The principles cannot be expected to cover all specific situations that may be encountered by the practicing athletic trainer, but should be considered representative of the spirit with which athletic trainers should make decisions. The principles are written generally and the circumstances of a situation will determine the interpretation and application of a given principle and of the Code as a whole. Whenever there is a conflict between the Code and legality, the laws prevail. The guidelines set forth in this Code are subject to continual review and revision as the athletic training profession develops and changes.

PRINCIPLE 1
Members shall respect the rights, welfare, and dignity of all individuals.
1.1 Members shall not discriminate against any legally protected class.
1.2 Members shall be committed to providing competent care consistent with both the requirements and the limitations of their profession.
1.3 Members shall preserve that confidentiality of privileged information and shall not release such information to a third party not involved in the patient’s care unless the person consents to such release or release is permitted or required by law.

PRINCIPLE 2
Members shall comply with the laws and regulations governing the practice of athletic training.
2.1 Members shall comply with applicable local, state, and federal laws and institutional guidelines.
2.2 Members shall be familiar with and adhere to all National Athletic Trainers’ Association guidelines and ethical standards.
2.3 Members are encouraged to report illegal or unethical practice pertaining to athletic training to the appropriate person or authority.
2.4 Members shall avoid substance abuse and, when necessary, seek rehabilitation for chemical dependency.
PRINCIPLE 3
Members shall accept responsibility for the exercise of sound judgment.

4.1 Members shall not misrepresent in any manner, either directly or indirectly, their skills, training, professional credentials, identity or services.
4.2 Members shall provide only those services for which they are qualified via education and/or experience and by pertinent legal regulatory process.
4.3 Members shall provide services, make referrals, and seek compensation only for those services that are necessary.

PRINCIPLE 4
Members shall maintain and promote high standards in the provision of services.

4.1 Members shall recognize the need for continuing education and participate in various types of educational activities that enhance their skills and knowledge.
4.2 Members who have the responsibility for employing and evaluating the performance of other staff members shall fulfill such responsibility in a fair, considerate, and equitable manner, on the basis of clearly enunciated criteria.
4.3 Members who have the responsibility for evaluating the performance of employees, supervisees, or students, are encouraged to share evaluations with them and allow them the opportunity to respond to those evaluations.
4.4 Members shall educate those whom they supervise in the practice of athletic training education with regard to the Code of Ethics and encourage their adherence to it.
4.5 Whenever possible, members are encouraged to participate and support others in the conduct and communication of research and educational activities that may contribute knowledge for improved patient care, patient or student education, and the growth of athletic training as a profession.
4.6 When members are researchers or educators, they are responsible for maintaining and promoting ethical conduct in research and educational activities.

PRINCIPLE 5
Members shall not engage in any form of conduct that constitutes a conflict of interest or that adversely reflects on the profession.

5.1 The private conduct of the member is a personal matter to the same degree as is any other person’s except when such conduct compromises the fulfillment of professional responsibilities.
5.2 Members of the National Athletic Trainers’ Association and others serving on the Association’s committees or acting as consultants shall not use, directly or by implication, the Association’s name or logo or their affiliation with the Association in the endorsement of products or services.
5.3 Members shall not place financial gain above the welfare of the patient being treated and shall not participate in any arrangement that exploits the patient.

5.4 Members may seek remuneration for their services that is commensurate with their services and compliance with applicable law.
Michigan State University
Undergraduate Athletic Training Education Program

Contractual Agreement

I, ___________________________ accept the position of athletic training student at the Michigan State University. I have been read the **Michigan State University Undergraduate Athletic Training Handbook** and understand all of the information contained in it.

I accept this contract with the understanding that I am representing the Michigan State University Undergraduate Athletic Training Education Program at all times. In accepting the terms of this contractual agreement, I understand that being an athletic training student is a commitment which is preparing me to be a certified athletic trainer. I understand that I will be closely supervised by the Michigan State University Athletic Training Staff and that my progress will be evaluated according to the criteria in the syllabus of clinical education courses and the Academic and Clinical Policies section of the Undergraduate Athletic Training Handbook. I furthermore understand that my evaluation will become part of my personal records and my performance will partially determine my continuance in the program.

Student’s Name: __________________________________________________________

Student’s Signature: ___________________________ Date: __________
I, ______________________________, acknowledge by signing below that I have been informed that I may serve in the role of a First Responder during my clinical education and field experiences. I also acknowledge that I have been informed of the duties and role of a First Responder as stated below:

**First Responder:** A first responder has additional, specialized training that qualifies an athletic training student to assist in the evaluation or recognition, stabilization, initial treatment and disposition of an individual who is injured or suddenly takes ill; these tasks are achieved using minimal equipment. First responders are trained in first aid and CPR techniques. A first responder’s responsibility includes referral to appropriate medical personnel or facility. An athletic training student who is unsupervised must only function as a first responder. This may include activities such as prophylactic taping, stretching, first aid and referral of injured/ill athletes. Other athletic training functions such as return-to-play decisions, modality or rehabilitation treatments are out of the realm of a first responder.
