9 EBP CEU/ 11 Category A CEU)

May 9, 2016– May 11, 2016
College of Osteopathic Medicine
East Fee Hall
The workshop is designed to provide fundamental knowledge of clinical techniques used in the identification and management of structural pathologies of the cervical region, thoracic spine, ribs, lumbar spine, pelvic girdle and sacrum. The program includes didactic classroom work that is integrated with extensive “hands-on” experiences. The focus of the educational sessions is on the application of clinical techniques to be used in the athletic training room for the identification and management of structural pathology of the spine and pelvic girdle. The objectives of the course are:

1. To describe the principles and techniques for the structural evaluation of the spine for practicing athletic trainers.
2. To learn and practice the principles and techniques of layer palpation, segmental vertebral motion and vertebral dysfunction.
3. To learn and practice the principles of musculoskeletal screening for structural pathologies in the thoracic spine, lumbar spine and pelvic girdle.
4. To learn and practice muscle energy techniques to correct structural dysfunctions of the thoracic spine, lumbar spine and pelvic girdle.
